

# INNOVAC® FT

**Inactivated fowl typhoid vaccine**

Reg. No. CTD 3518 (Kenya PPCB)

## INNOVAC® FT

INNOVAC® FT is an inactivated *Salmonella gallinarum* vaccine for active immunization of chickens and turkeys against fowl typhoid disease. It is prepared from five strains of *Salmonella gallinarum* bacteria.

## COMPOSITION

Each 1ml dose of INNOVAC® FT contains a minimum of 2x10<sup>8</sup>CFU of inactivated *Salmonella gallinarum* bacteria in 1% formalin saline.

## INDICATIONS

INNOVAC® FT is for active immunization of chickens and turkeys against fowl typhoid disease (*Salmonella gallinarum* infections).

## STORAGE

- Store between +2°C and +8°C (Refrigerator).
- Do not freeze.
- Protect from heat and direct sunlight.

## ADMINISTRATION AND DOSAGE

- Shake well before use.
- Dosage: Administer 1ml vaccine per bird by intramuscular injection into thigh or breast muscles.
- Vaccinate only healthy birds.
- Use sterile syringes and needles, and avoid contamination.
- Once the vaccine bottle has been opened, it should be used immediately.

## VACCINATION SCHEDULE

- First dose: 6-8 weeks of age.
- Second dose: 14-16 weeks of age.

## CONTRA-INDICATIONS AND WARNINGS

- For veterinary use only.
- Do not use in sick or unhealthy birds.
- Do not use after the expiry date printed on the label.
- Do not use if vaccine package or seal is broken or damaged.
- As may occur with all vaccines, rare allergic reactions may occur in some vaccinated birds. If this occurs, seek veterinary advice.
- Blood or serum from vaccinated birds may test positive for antibodies against *Salmonella gallinarum* and *S. pullorum*, and this may have implications for international trade. Contact local veterinary authorities for advice.

## WITHDRAWAL PERIODS

- No withdrawal period.

## PRESENTATION

INNOVAC® FT is presented bottles of 25 doses, 50 doses, 100 doses and 500 doses of vaccine.
